

Report on the Pre-adoption Workshop

**Jointly organized by Indian Society for Sponsorship and Adoption (ISSA) and
Atmaja: The Association of Adoptive Parents on 23 July, 2022, at Nabajeevan, P41 Metropolitan
Co-operative Housing Society, Kolkata 700105**

Eight pre-adoptive parents (PAPs) attended the workshop.

The day's proceedings began at around 11:00 AM with welcome address by Soumeta Medhora (ISSA) and Swapan Naskar (Atmaja) followed by an excellent start-off by Gautam Gupta and Nilanjana Gupta outlining the challenges and joy in adopting a child and also the little differences between having a biological child and a child by adoption. Then there was a session on introduction of the participants and the resource persons.

This followed the plan with one Atmaja representative meeting with each couple to listen to them and understand their preparedness for adoption. The narration by Subir Mukherjee and Prasun Gangopadhyay on their experience, understanding and approach to create the bonding seemed to have moved the participants. Swapan Naskar discussed the issue of disclosure. Soumeta Medhora gave detailed description on the procedural and legal steps, while Subir Banerjee pointed out the psychological, medical and nutritional concerns and needs. A play-act session arranged by the ISSA-Atmaja team enacted two mock adoption meetings, to be held after the referral and before adoption is approved, enthralled all present and has been much appreciated. Finally, The open forum, led by Prasun Gangopadhyay and Kaustuv Bhattacharyya, basically collected individual opinions and feedbacks from the participants with more spontaneous discussion.

The end had to come at around 5:15 PM with closing remarks by Soumeta Medhora and Anup Dewanji and thanks to each other.

According to the feedback, all the participants seemed to have enjoyed and benefitted from the workshop; they also appreciated the need of such workshop. Most of them felt that the organization of the workshop was good pointing out that the interactive sessions were most helpful while appreciating the sharing of experience by the adoptive parents. They also felt positively about the sessions on procedural/legal steps, medical concerns and disclosure. Special mention for the play-act session was the highlight of almost all the feedback. Some of them remarked that such meetings may be organized more often.
